Emissions reduction targets

AGB Pharma (UK) was committed to a 29% reduction in baseline emissions over the next 5 years. This has been achieved in 2025 even with the increased stock required to fulfil NHS needs in the growing marketplace for our current medicines. This has been mainly through less shipments and shorter journeys to port.

The graph below shows us tracking against target, AGB Pharma (UK) will continue to try to maintain further reductions moving forward, as our transport vehicles move into more carbon friendly efficient fuels

Projected vs Actual

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects will be initiated throughout 2026 and will continue through the lifetime of the commitment to net zero, along with new initiatives when required:

Look at carbon offset activities ie Ecologi
Use greener transport both up and down stream i.e. solar powered, biofuel
Increase monitoring of impact to environment, and act accordingly
Better stock management to allow for less shipments
